

OmniReg Modular Pressure Regulator

Applications

Commercial 1" plastic models

This pressure-regulating device enables the user to quickly and accurately set the exact downstream pressure required for any application.

Key Features and Benefits

- Maintains constant downstream pressure, regardless of widely varying inlet pressure
- One model fits all heavy-duty commercial 100 Series, 700 Series, 200B and 311A Series valves
- Requires only 1 GPM to operate
- "Drop in" installation is fast and easy, requiring tightening of only two capture screws

Operating Specifications

- Inlet pressure range: Up to 200 psi (13,8 Bars)
- Inlet pressure range: Up to 200 psi (13,8 Bars)
- Pressure regulation: OMR-30: 5 to 30 psi (0,34-2 Bars), OMR-100: 5 to 100 psi (0,34-7 Bars)
- Inlet pressure to be 10 psi (0,7 Bars) greater than outlet pressure

Specifying information

Model	Description
OMR-30	5-30 psi (0.34-2 Bars)
OMR-100	5-100 psi (0.34-7 Bars)
OMR-DS	Downstream sensing kit
